

Benedict Pabatao

LEAD PLATFORM ENGINEER · FULL-STACK · AWS

Italy (Remote) / jajapabatao@gmail.com / linkedin.com/in/benedict-pabatao / github.com/bpabatao

SUMMARY

Lead Platform Engineer, 8+ years in software, 5+ hands-on with AWS, and ~3 years leading cloud platforms end to end - from AWS infrastructure-as-code to the shared backend services an entire product fleet runs on. Near-sole author of a Terraform control-plane and internal provisioning platform that ships 8 multi-tenant client portals on ECS Fargate, and primary author (78%) of the core API those portals are built on. Operates ~\$110K/year of multi-tenant portal infrastructure on AWS, turns it into self-service, and builds the products on it end to end - full-stack from React/TypeScript through Node/GraphQL - not just the infrastructure they run on.

PROFESSIONAL EXPERIENCE

Lead Platform Engineer

Jun 2023 – Present

ESC Partners / HometownHUB - New York, USA (Remote)

- **Primary author (78%) of the core API middleware** connecting 8 utility-customer tenant portals (Delta, IPU, MVU, NEP, DelCo, Alex Renew, Web Aruba, Carmel) to Oracle CCS via OAuth 2.0 - the multi-tenant auth, data-access, and integration patterns the whole fleet is built on.
- **Sole author of the internal developer platform:** a Terraform control-plane (9 stacks, ~60 AWS resource types) with a Fastify/React dashboard that self-service provisions and ships every client environment - Cognito, ECS Fargate, CloudFront, WAFv2, Secrets Manager, Route 53, ElastiCache, KMS - turning tenant onboarding into a templated, repeatable workflow.
- **De-facto technical lead of a 5-engineer team** - most senior hands-on engineer, reporting to the COO/CEO; set the platform standards the fleet adopts (provisioning modules, CI/CD, security guardrails).
- **Designed and built a multi-channel campaign manager** integrating Twilio (SMS + IVR voice) and AWS SES (email) with CSV recipient lists and templated messaging, replacing manual notification workflows.
- **Built an automated batch pipeline** syncing multi-account customers between Oracle CCS and Invoice Cloud in 5K-record batches - idempotency checks, error tracking, and automated success/failure email reporting.
- **Built the team's AI-augmented developer tooling** - an AWS Bedrock auto-remediation service (Claude via bedrock-runtime) that triages alerts and opens fix PRs, an automated Claude PR-reviewer in CI, an agentic AI-SDLC pipeline (Asana + GitHub, with human approval gates), and an LLM-maintained knowledge base.
- **Own and operate the multi-tenant portal infrastructure as sole platform engineer** - ~\$110K/year of AWS across the 8-tenant production and test fleet - with CI/CD (Bitbucket Pipelines), Datadog / CloudWatch observability, and cost-attribution tooling (Cost Explorer API) driving right-sizing, shared-ALB, and Fargate-Spot savings.
- **Owned production go-live readiness for 6 client launches** (primary engineer on MVU, Web Aruba, NEP, Carmel; core contributor on Alex Renew, DelCo) - environment validation, deployment, rollback planning, and stabilization.

Senior Full-Stack Engineer

Mar 2024 – Present

Nmblr - Biopharma Strategy & Collaboration Platform (freelance) - Remote

- One of 3 core engineers on an ISO 27001-certified biopharma strategy SaaS (React/TypeScript, Node/GraphQL/Prisma, AWS Elastic Beanstalk), reporting to the CEO; private beta with enterprise pharma clients.
- **Originated two subsystems from scratch:** a DMMF-driven strategy clone engine (automated deep-clone of entire strategies) and the Edge archive/restore isolation system.
- Contributed to real-time collaboration (GraphQL subscriptions), OpenAI-backed generation features, and platform security (OWASP/IDOR, JWT sessions).
- Added production observability - streamed Elastic Beanstalk logs to CloudWatch with enhanced health reporting - and contributed to CI/CD workflow tuning.

EARLIER EXPERIENCE

Senior Software Engineer - Ordermentum (contract, concurrent)

Sep 2022 – Feb 2023

Designed and deployed a restaurant ordering and payment management system for hospitality clients.

Senior Software Engineer - CoDev (Utah, USA / Remote)

Mar 2022 – May 2023

Built GIS-based hunting/mapping systems and an internal talent-management portal (JavaScript, Docker); improved reliability through rapid, iterative issue resolution.

Senior Software Engineer II - HCL Technologies (New York, USA / Remote)

Feb 2020 – Mar 2022

Shipped product features at scale; built and maintained automated test suites (Selenium) for unit, integration, and acceptance testing; led code reviews and knowledge transfer.

Additional: Software Developer at Zencomputes, Singapore (2019-2020); Mobile App Developer at Halcyon Digital, Philippines (2018-2019).

TECHNICAL SKILLS

CLOUD & INFRA AWS (ECS Fargate, S3, SES, CloudFront, Cognito, Route 53, VPC, ALB, RDS, Elastic Beanstalk, ElastiCache, KMS, Secrets Manager, WAFv2, Bedrock), Terraform (IaC), Docker, Linux, OpenSearch

PLATFORM & DEVOPS Internal Developer Platform (IDP), self-service / templated multi-tenant provisioning, CI/CD (Bitbucket Pipelines, GitHub Actions), Cloud Cost Optimization / FinOps (Cost Explorer)

OBSERVABILITY & SECURITY Datadog (RUM / APM), CloudWatch, Sentry, structured logging; OWASP / IDOR, JWT, WAF, Secrets management, Snyk

BACKEND & DATA Node.js, Fastify, Express, TypeScript, Prisma, PostgreSQL, MongoDB, GraphQL, Redis / BullMQ, Oracle Utilities CCS, Invoice Cloud

AI ON THE PLATFORM AWS Bedrock (Claude via bedrock-runtime), AIOps / auto-remediation, agentic AI-SDLC pipelines, AI code review, LLM-maintained knowledge bases

FRONTEND React, TypeScript, Redux, Styled Components

PRACTICES Platform Engineering, Infrastructure-as-Code, System Design & Architecture, Security & Compliance, Incident Response

EDUCATION

BS Information Technology

2014 – 2018

Polytechnic University of the Philippines
